TITLE : AIR CLEANING FILTER

ABSTRACT : PURPOSE: To provide a honeycomb air cleaning filter consisting of a flute and a liner, capable of sufficiently holding its shape without using any auxiliary member such as a reinforcement, maintaining a balance of the treated air flow and capable of effectively removing dust and malodor at the same time with a good balance.

CONSTITUTION: The flute 1 is formed with dust removing electret sheet-shaped nonwoven fabric and the inner 2 with a sheet-shaped activated carbon coated with a deodorant, or the flute 1 is formed with the sheet-shaped activated carbon and the liner 2 with dust removing electret sheet-shaped nonwoven fabric. A miniaturized air cleaning filter 3 having a low pressure drop is obtained in this way.
